

cloudbase: Flexible Delivery for Engineering Development Tools

Software and systems delivery is changing to adopt agile and continuous engineering approaches. A flexible and effective infrastructure to support these approaches is critical to success.

Welcome to **cloudbase**, SyntheSys' Software-as-a-Service (SaaS) licensing toolset for engineering software. Gone are the days when software was purchased on an annual basis using unreliable usage forecasts, software licences can now be rented 'on demand', matching actual usage with actual licences.

So what are the tools?

cloudbase focuses on the best in requirements management, design management, project management and validation management to accelerate effective software and systems delivery which fundamentally improves output quality.

It's no secret that requirements management, definition and engineering practices are the foundation of project success. **cloudbase RM** best practices to requirements management is proven to save time and money by helping to avoid unnecessary development costs as a result of poor requirements management practices.

cloudbase PM offers Change, Configuration and Release Management solutions which improve quality, increase productivity, unify work teams, automate development processes and provide traceability across the software development life cycle.

Our Design Manager module, **cloudbase DM** provides collaborative design and development for systems engineers and software developers.

cloudbase VM facilitates Testing & Validation Management which transforms the way teams work together to deliver enduring quality across systems and software delivery life cycles from requirements, development, validation assurance, security and compliance to deployment.

The cloudbase Philosophy: An end-to-end Approach

The cloudbase philosophy is built on the ideal that organisations want to access more than just a licence key. Our 4-phase service, delivery and support model ensures that our customers receive an holistic, value added service from us.

What can you expect as part of cloudbase?

About SyntheSys

SyntheSys provides defence systems, training, systems and software engineering and technical management services over a spectrum of different industry sectors. Along with distinct support and consultancy services, our innovative product range makes us first choice provider for both large and small organisations. Established in 1988, the company focus is on fusing technical expertise with intuitive software applications to solve common industry challenges.
