

## cloudbase: Flexible Delivery for IBM® Toolset

Software and systems delivery is changing to adopt agile and continuous engineering approaches. A flexible and effective infrastructure to support these approaches is critical to success.

Welcome to **cloudbase**, SyntheSys' Software-as-a-Service licensing toolset for IBM® software. Gone are the days when software was purchased on an annual basis using unreliable usage forecasts, software licences can now be rented 'on demand', matching actual usage with actual licences.

### So what are the tools?

**cloudbase** focuses on the best in Requirements Management, Design Management, Validation Management and Project Management to accelerate effective software and systems delivery which fundamentally improves output quality.

#### cloudbase RM: Requirements Manager

It's no secret that requirements management, definition and engineering practices are the foundation of project success. IBM® DOORS® and IBM® DOORS® Next Generation best practices to requirements management is proven to save time and money by helping to avoid unnecessary development costs as a result of poor requirements management practices.

#### cloudbase PM: Project Manager

Built around IBM® Rational Team Concert™, **cloudbase PM** offers Change, Configuration and Release Management solutions which improve quality, increase productivity, unify work teams, automate development processes and provide traceability across the software development life cycle.

#### cloudbase DM: Design Manager

Our Design Manager module uses IBM® Rhapsody® to provide collaborative design and development for systems engineers and software developers.

#### cloudbase VM: Validation Manager

**cloudbase VM** facilitates Testing & Validation Management which transforms the way teams work together to deliver enduring quality across systems and software delivery life cycles from requirements, development, validation assurance, security and compliance to deployment. All this is done using proven IBM® Quality Manager functionality.

## The **cloudbase** Philosophy: An end-to-end Approach

The **cloudbase** philosophy is built on the ideal that organisations want to access more than just a licence key. Our 4 Phase Service, Delivery and Support Model ensures that our customers receive an holistic, value added service from us.

### What can you expect as part of the **cloudbase** product?

#### Training & Mentoring

We design our training based on individual organisational goals and aim to instruct organisations on how to use IBM® Software as part of the **cloudbase** package.

#### Flexible SaaS Licence

Your IBM® SaaS licence is included as part of the **cloudbase** package.

#### Consultancy

We help organisations develop and implement sound management & product development strategies which keep your operational business moving in the right direction.

#### Termination

We will teach you how to create a lasting impression within your software & systems development as part of our close down procedure.

### About SyntheSys

We provide Systems and Software Engineering and Training services over a spectrum of different industry sectors. Along with these support and consultancy services, our innovative product range makes us first choice provider for both large and small organisations. Established in 1988, we focus on fusing engineering experience with innovative technology to solve industry challenges.
