

Ensuring IBM® Tools Work for you - IBM® Engineering Requirements Management DOORS® Family

Tool-Supported Systems Engineering

We specialise in tool-supported systems engineering – providing our Customers with affordable systems engineering tools to increase their efficiency and effectiveness in delivering solutions to their Customers.

As an IBM Watson Internet of Things (IBM Watson IoT™) Gold Business Partner, SyntheSys provides a unique blend of application knowledge, experience and a flexible delivery mechanism, which provides Customers with the right software solution and a deeper understanding of the tools to ensure maximum benefit.

Our ability to work with IBM® to distribute Watson IoT™ software is built on a firm foundation of industry know-how and extensive knowledge of the IBM® IoT™ tools which enables us to distribute the tools in a value-added way. Our broad expertise of IBM® solutions makes us best placed to offer a value-added way. Our offerings stretch much further than the deployment of technology.

IBM® DOORS® Family Functionality

IBM® DOORS® Family allows you to capture, trace, analyse and manage changes to information and demonstrate compliance to regulations and standards. IBM® DOORS® Family is a proven technology and has been used to accelerate highly complex engineering projects. DOORS® Family gives organisations a sophisticated, automated solution to standardise and manage their requirements more efficiently:

- Improves overall systems and software quality whilst meeting your customer requirements;
- Intuitive change configuration and notification features creates comprehensive capability;
- Facilitates collaboration through improved visibility;
- Integrates design, development and test environments;
- Enables organisations to demonstrate regulatory compliance;
- Improves adaptability and allows organisations to become more responsive to end-user needs in a controlled, measured way.

We offer flexible licensing options, training and mentoring services in IBM® DOORS® Family.
