SyntheSys IBM® DOORS® Next QuickStart

SyntheSys IBM® DOORS® Next QuickStart focuses on the rapid adoption of the tool. Based on requirements management best practices, this service helps you achieve your communication, collaboration, compliance and verification objectives.

Activities

The IBM® DOORS® Next QuickStart service accelerates the deployment of IBM® DOORS® Next. This service reduces the time to self-sufficiency with IBM® DOORS® Next by creating a repeatable model for future projects and delivering an architecture that is ready for immediate use – one that supports your project life cycle.

As part of this service, SyntheSys QuickStart staff will deliver a documented and configured architecture that your project team can use immediately, with documented procedures for using and maintaining the defined architecture. Training and mentoring includes:

- Training on the newly defined architecture

- Initiates migration from IBM® DOORS® Family to IBM® DOORS® Next

- Defining processes and procedures that support the project life cycle

- Overview of built-in reporting capabilities

Using QuickStart to help you implement your IBM® DOORS® Next tools can help benefit your entire organisation. By setting up your project correctly with a combination of training and mentoring, you can leverage SyntheSys' experience successfully deploying IBM® DOORS® Next in a variety of environments. In addition, the service will provide a model and template that can be used as a foundation for definable and repeatable future projects across your organisation. You can minimise the effort needed by your organisation to successfully deploy the IBM® DOORS® Next solution, implementing your IBM® DOORS® Next tools quickly for the most moderate impact on your organisation.

Why use the SyntheSys QuickStart Team?

- We have the **most in-depth and up-to-date** IBM® DOORS® Next skills

- **We are experienced** in deploying IBM® DOORS® Next

- We have experience in **successfully delivering every stage of the systems engineering** project life cycle from installation, training and final roll out

- Highly skilled consultants **provide insight regarding best practices** (both from a solution design and requirements management standpoint)

- As an IBM® Partner, **we provide technical product information** and access to the development teams to support our projects
