

Ensuring IBM® Tools Work for you - IBM® Engineering Systems Design Rhapsody®

Tool-Supported Systems Engineering

We specialise in tool-supported systems engineering – providing our Customers with affordable systems engineering tools to increase their efficiency and effectiveness in delivering solutions to their Customers.

As an IBM Watson Internet of Things (IBM Watson IoT™) Gold Business Partner, SyntheSys provides a unique blend of application knowledge, experience and a flexible delivery mechanism, which provides Customers with the right software solution and a deeper understanding of the tools to ensure maximum benefit.

Our ability to work with IBM® to distribute Watson IoT™ software is built on a firm foundation of industry know-how and extensive knowledge of the IBM® IoT™ tools which enables us to distribute the tools in a value-added way. Our broad expertise of IBM® solutions makes us best placed to offer a value-added service. Our offerings stretch much further than the deployment of technology.

IBM® Engineering Systems Design Rhapsody®

The tool provides proven functionality for modelling and design management. The suite of tools offers development, design and test environments for software and systems engineers and teams. The IBM® Engineering Systems Design Rhapsody® suite supports SysML, UML and AUTOSTAR whilst facilitating control of defence frameworks and industry standards:

- The tool allows you to manage complexity within your software and system development processes;
- Collaborate, share and review artefacts created within IBM® Engineering Systems Design Rhapsody® or other tools;
- Ongoing validation through prototyping, swift simulation and execution to tackle errors effectively;
- Autonomous cross-checking to increase and enhance agility and promote reuse;
- Helps to reduce both recurring and non-recurring costs.

We offer flexible licensing options, training and mentoring services in IBM® Engineering Systems Design Rhapsody®.

About SyntheSys

SyntheSys provides defence systems, training, systems and software engineering and technical management services over a spectrum of different industry sectors. Along with distinct support and consultancy services, our innovative product range makes us first choice provider for both large and small organisations. Established in 1988, the company focus is on fusing technical expertise with intuitive software applications to solve common industry challenges.
