

Ensuring IBM® Tools Work for you - IBM® Engineering Test Management

Tool-Supported Systems Engineering

We specialise in tool-supported systems engineering – providing our Customers with affordable systems engineering tools to increase their efficiency and effectiveness in delivering solutions to their Customers.

As an IBM Watson Internet of Things (IBM Watson IoT™) Gold Business Partner, SyntheSys provides a unique blend of application knowledge, experience and a flexible delivery mechanism, which provides Customers with the right software solution and a deeper understanding of the tools to ensure maximum benefit.

Our ability to work with IBM® to distribute Watson IoT™ software is built on a firm foundation of industry know-how and extensive knowledge of the IBM® IoT™ tools which enables us to distribute the tools in a value-added way. Our broad expertise of IBM® solutions makes us best placed to offer a value-added service. Our offerings stretch much further than the deployment of technology.

IBM® Engineering Test Management Functionality

To achieve quality driven software and systems, development teams need to collaborate, share information and adopt a level of automation throughout the software and systems development process. IBM® Engineering Test Management offers test planning, test construction and test artefact management functions, which helps quality assurance teams collaborate, automate and govern more effectively:

- Uses comprehensive and customisable test plans to track quality driven software delivery;
- Provides powerful dashboards which present data and information in a more productive way;
- Offers test execution schedules which helps in optimising environment coverage;
- Facilitates collaboration of geographically dispersed teams through a web interface;
- Helps with test scheduling and execution through physical and virtual lab assets;
- Provides manual test authoring with rich text and inline images for exact test definition.

We offer flexible licensing options, training and mentoring services in IBM® Engineering Test Management.
