

# Matt Hirschfield

## Bio

### Matt Hirschfield

**Matt started his working life as a trainee electronic engineer and explored various engineering disciplines.**

Having progressed to technical authoring back in 2004 he has been writing everything from user manuals to business processes for over 17 years.

For the past 8 years Matt worked for Aerospace firm, Daifuku Logan where he worked with Requirements Engineering to administer the IBM® Engineering Lifecycle Management tool suites for multiple projects and developed the use of the tool within the business.

Matt is a proud father and loves the outdoors, particularly enjoying running, cycling and walking to keep fit. He has interests in music and photography. Matt enjoys riding and restoring classic motorcycles. His current project is a 1971 Honda CL100 which is currently testing his problem-solving skills.

Principal Engineer  
SyntheSys Technologies

### About SyntheSys

SyntheSys provides defence systems, training, systems and software engineering and technical management services over a spectrum of different industry sectors. Along with distinct support and consultancy services, our innovative product range makes us first choice provider for both large and small organisations. Established in 1988, the company focus is on fusing technical expertise with intuitive software applications to solve common industry challenges.
