

Jaguar Land Rover Requirements Writing Training

SyntheSys Technologies Supporting Jaguar Land Rover

As an IBM® Gold Business Partner with an acknowledged and certified expertise with IBM® Engineering Requirements Management DOORS® Family, SyntheSys is proud to be supporting one of the most pioneering automotive manufacturers in the world, Jaguar Land Rover (JLR).

Gold
Business
Partner

JLR is an extensive user of IBM® requirements management solutions within the engineering business.

It was identified that the actual process and methodology for writing requirements within the organisation would benefit from a consolidated and coherent approach. Working with IBM® and JLR, a one-day training course was devised and maintained in the principles of requirements writing, which focuses on the underlying methodology regardless of tool usage.

In recognition of our skills in this area teamed with our systems engineering training capabilities, we have successfully delivered 60 one-day courses to over 800 employees at JLR.

The IBM logo and the IBM Gold Business Partner mark are trademarks of International Business Machines Corporation, registered in many jurisdictions worldwide.

About SyntheSys

SyntheSys provides defence systems, training, systems and software engineering and technical management services over a spectrum of different industry sectors. Along with distinct support and consultancy services, our innovative product range makes us first choice provider for both large and small organisations. Established in 1988, the company focus is on fusing technical expertise with intuitive software applications to solve common industry challenges.
