

# Ensuring IBM® Tools Work for you - IBM® Engineering Workflow Management

## Tool-Supported Systems Engineering

**We specialise in tool-supported systems engineering – providing our Customers with affordable systems engineering tools to increase their efficiency and effectiveness in delivering solutions to their Customers.**

As an IBM® Gold Business Partner, SyntheSys provides a unique blend of application knowledge, experience and a flexible delivery mechanism, which provides Customers with the right software solution and a deeper understanding of the tools to ensure maximum benefit.

Gold  
Business  
Partner

Our ability to work with IBM® software is built on a firm foundation of industry know-how and extensive knowledge of the IBM® tools which enables us to distribute the tools in a value-added way. Our broad expertise of IBM® solutions makes us best placed to offer a value-added service. Our offerings stretch much further than the deployment of technology.

## IBM® Engineering Workflow Management Functionality

The tool facilitates individuals and teams to collaborate to build better software and systems by aligning development environments. The tool provides an all-in-one common platform where the user can manage workspaces and software version control more effectively whilst facilitating development support:

- Promotes consistent processes which improves overall software and systems quality;
- Improves productivity and flexibility with an open standard-based platform;
- Improves real-time collaboration for distributed project teams;
- Gives teams a greater level of transparency with health information and status transparency;
- Offers integrated source control, work item and build capabilities.

We offer flexible licensing options, training and mentoring services in IBM® Engineering Workflow Management.
