

Link 11

Table of Contents

Chapter 1 - Link 11 Overview

- Link 11A
- Link 11 Functions
 - Picture Compilation
 - Command and Control Free
 - Text Messages
- System Description
- Documentation
- Net Architecture
- Link 11B

Chapter 2 - Link 11 Equipment

- Link 11 Equipment
 - Tactical Data System
 - Encryption Equipment
 - Data Terminal Set
 - Link Protocol Control TDS
 - Interface Control DTS
 - Operating Modes
- Link 11 Radios
 - UHF & HF Radios
 - Aerial Couplers Aerials
 - Link 11 Voice Requirements

Chapter 3 - Link 11 Operating Systems

- Link 11 Transmissions
 - CLEW
 - Preamble
 - Data Frame
 - Transmission Composition
 - SLEW
 - Preamble
 - Header
 - Data Frames
 - Reinsertion Probe
 - End of Message Indicator
 - Waveform Generator
- Link 11 Developments
 - Dual Net Link 11 (DNL)
 - Multi-Frequency Link 11 (MFL)
- Link 11 Operating Modes
 - Full Roll Call
 - Partial Roll Call
 - Roll Call Broadcast
 - Net Cycle Time (NCT)
 - Broadcast
 - Net Synchronisation & Net Test

Chapter 4 - Link 11 Operations

- The Link 11 Environment
- The Force Track Coordinator
- The Net Control Station
- Factors to be Considered when Selecting NCS
- Establishing a Link 11 net
- The Data Link Reference Point (DLRP)
- Picture Registration
- Correlation
- Track Quality (TQ)
- Reporting Responsibility
- Filtering
- Link 11 Track Numbering
 - Pool System
 - Track Block System
 - Mixed Allocation
- Link 11 and Jamming
 - Disruption
 - Deception
- Link Management Codes
- Link 11 Duty Codes
- Link 11A OPTASK Link

Chapter 5 - Link 11 Messages

- Link 11 Messages
- Link 11B Messages
- Message Subjects

Annex A to Chapter 5

- Detailed Link 11 Message Structure

Chapter 6 - Link 11B (TADIL B)

- Link 11B Architecture
- Link 11B Modes of Operation
 - Link 11B RU Transmission States
 - Transmission Opportunities
- Link 11 and Link 11B
